When I was merely a girl I heard read
from the Life of William Henry ^{by Gordon} that ^{he} ^{was} ^{the} ^{first} ^{to} ^{make} ^{guns} ^{for} ^{the} ^{men} ^{of} ^{the} ^{Philade-}
^{lphia} ^{Western} ^{Society}
already making guns for the men of General Washington's army, ~~he~~ noticed the
extraordinary talent of a little ragamuffin
who ^{was} ^a ^{picture} ^{drawer}
chalked onto a rock. Without learning
he was the son of the tavern keeper
near Bolton where Henry guns were made
by hand by workers always naked to the
waist, said come you can't draw a
man naked unless you see one. "In a
period of extreme pressure ^{at the gun factory} he ordered a worker
to come inside his house, and ^{I think} ~~stop~~ to be a
model for B. W. Later the head of the British Academy
