My dear Mrs. Mada Valje

Thank you for your very kind letter. The splendor of Min Gambarens were terribly important to me growing up and the feudal situation between the miners, the agonizing wealth between River Street mansions and the small houses where miners lived cause me worry to worry since since early childhood.

I think Dr. Farley genius and dedication have changed life in our valley. The library is all part of this, and your wonderful competence notes on the back of pictures, most of it, is in the hand writing of our Sister. Melanie Goldschlager Altherton Updegraff
