FORGET ABOUT WINTER STORMS

Sudden drenching showers driven by strong winds will knock down clothes-poles, rip clothes off the line or set them dragging on the wet ground. This is hard on the clothes and hard on the homemaker. No wonder the automatic clothes dryer is so popular. Forget about the weather, forget about the time. You can dry clothes any day and at any hour. Clothes are handled gently and quickly in the dryer. They are easy to iron and some articles will need no ironing.

See automatic clothes dryers at Public Service stores or at your local dealer's.
