

This copy of the Samuel Perreault Survey (Commissioned by the Office of the Surveyor General) is copied from the Original Map of Antelope River in the Survey of the same name. It will be seen that this Survey as well as the Original Survey and that made by the Surveyor General in 1802 are all using the North line down to the water near the a just below the Lookout. It is not possible to stretch this Survey to meet the Andrew Anderson's.
