

Establishing an Arnaud C. Mott's "Religion
in Life" fund, 1973

5.4

*The President, Trustees and Faculty
of Bucknell University*

are pleased to announce the establishment of the Arnaud C. Marts "Religion-in-Life" Fund in honor of the 7th President of the University. The endowed lecture fund will bring to the campus outstanding religious leaders to speak with students on religious issues or spiritual matters in Chapel or in special programs. The fund is intended to sustain the University's interest in the spiritual, as well as intellectual, development of its students which was emphasized by Dr. Marts during his presidency in the establishment of an annual program of religious emphasis weeks, a program which has been continued and expanded in the present "Colloquy" series. Because of Dr. Marts' interest in the promotion of interfaith understanding, the fund is administered by the President with this emphasis.

One hundredth in order of founding among American colleges and universities, Bucknell is an independent coeducational university offering courses in the liberal arts, liberal sciences, business administration, education, and engineering. Her beautiful 300-acre campus, notable for its giant oaks and elms, is located at Lewisburg in central Pennsylvania's picturesque Susquehanna Valley.

The student body is composed of 2,900 undergraduates and 200 graduate students from 40 states and 27 foreign countries.

The University confers nine baccalaureate and eight master's degrees. Undergraduates may select studies leading to one of the following degrees: Bachelor of Arts, Bachelor of Music, Bachelor of Science (in animal behavior, biology, chemistry, geology, mathematics, or physics), Bachelor of Science in Business Administration, in Education, or in Chemical, Civil, Electrical, or Mechanical Engineering.

Combined undergraduate-graduate programs which shorten the time normally required for the master's degree are available for highly-qualified students in biology, chemistry, engineering, and mathematics. In addition, the University offers a five-year program combining liberal arts and engineering.

An excellent library, modern classroom buildings, and well-equipped laboratories, including a widely-used third-generation computer system, reinforce Bucknell's strength in the academic world. The physical plant includes 22 major buildings. Newest of these is the University Center which provides centralized dining facilities and serves also as a focus for extra-curricular activities.
