Thinking about Butler as a combatant to talk of sabotage.

It's virtually a meditation since Hubbard has so little to do. Look like a letter to Hubbard.

In the meantime, people like Dix Butler are infuriated when they can't go on raids. Butler tells one of his Cubans, "If it's worth a hundred bucks to you, bring me an ear." The Cuban brings him back two, and Butler laughs and complains and tells him the deal is off, but actually pays him \$200, which they spend on a feast in a Florida restaurant. Lansdale, speaking to

That's fatal to a revolution. The other day the Attorney General said to me, 'Why lose lives if the return isn't clearly, clearly worth it.'"

Harvey in turn is forever talking about how much he hates Bobby Kennedy's guts. "That doublecrossing hypocritical macho

In turn, Hubbard gets a sense of RPK always being dissatisfied with MONGOOSE. he was always asking them to do more but didn't really know what it was they should do. He was too busy in 1962. he took a trip around the world in february, he had the steel fight in April, and civil rights was always on his head. Ole Miss came in September and on top of that, he was trying to deal with organized crime, with Jimmy Hoffa, with Lyndon Johnson, with Edgar Hoover, telling Schlessinger, "Castro was high on his list of emotions, much lower on his list of informed concerns."

On April 26, at a Special Group meeting, general Taylor asks Harvey to attend and report on agent activities. Harvey does and discusses a few small operations but does not mention Rosselli. He speaks rather of attempts to contaminate exports, certain subtle sabotage of machinery causing ball bearings to break down early, cites the boats in Miami that are gotten up as pleasure boats but contain 50 calibre machine guns, and as he talks, Hubbard, backing him up as his assistant, thinks of the houses on the water from which those boats go out, pink and stucco yellow, cobalt blue and green, and how the foliage is orange. Harvey and Lansdale could hardly speak. Harvey had complained to McCone of the control requirements on April 10, and had suggested they might be made less restrictive, and less stultifying. A portrait here could be given of McCone

Letter from Harry

on raising money for

60 wounded members of
the brigade arrive in Miami and 20,000
people, mostly Cubans, meet them.
Hubbard, going out for the day to
observe it, sees a field of white
handkerchiefs in the air. The prisoners
crippled, ^{one with} one arm gone on one, a leg
missing on another, eyes shut forever,
come out of the plane and are met by
people who were prisoners from the
brigade originally who had escaped.
They now carry the brigade flag, the
Cuban flag and the US flag. Millions
watch by way of TV.

Kennedy met with Enrique Ruiz-Williams a
day or two later. This is all in the
book by Haynes Johnson, the Bay of Pigs,
which came out in 1967, I believe, and
is W.W. Norton. Castro, in return for
his 1,179,000 Cuban exiles, is asking
for a \$62 million dollar ransom. That's
April 14, 1962.

All of these events, included in the exchanges with Rosselli, do take place in April, and in fact can be orchestrated together. The chapter could end with the big fight between RFK and Harvey down in the bowels of Task Force W which incidentally is in Washington while JM/WAVE is in Miami, and I quote directly from The Man Who Kept the Secrets, p. 161. Before that, p. 157, I do want to get in the following:

"The Kennedys' dissatisfaction with the pace of MONGOOSE were passed on to SGA who pressed Lansdale who pushed Helms who demanded results from Harvey and Task Force W. Reports and memos sent back up the line were frequently kicked back by Helms who complained that they were not sufficiently positive in tone. Not sufficiently "forward-leaning" in tone, a Lansdale cant word. 'There's a

lot of ways to write the English language to make it sound like we're moving ahead,' Helms told Harvey."

This is the big quote from p. 161: *HS*

"Early in 1962, Harvey and Kennedy had a direct collision during the tour of the CIA station in Miami. Kennedy noticed something on the teletype which connected the station to CIA Headquarters in Langley. He tore off a long strip to read and then headed for the door with the strip in his hand. Harvey had recently returned from lunch and he drank neither more nor less than usual. Seeing Kennedy heading for the door with a strip of agency message paper in his hand, he called out, 'Hey, where are you going with that?' Kennedy did not welcome the question nor its tone, but Harvey was not about to let

anyone walk around with an internal CIA

document related to message instructions and operational codes. He walked down to Kennedy + physically grabbed the piece of paper out of Attorney General's hand

Another quote from the same page, 161,
which will be used not here but later,
during the missile crisis: *Final of*
page

"Later at a meeting during the missile
crisis, when both Kennedys were present,
according to a number of sources, Harvey
had the temerity and professional ill
judgment to say clearly in the midst of
witnesses who were genuinely horrified
at the idea of saying anything so baldly
critical to a president, that the crisis
was their own fault: if they'd never
made an official distinction between
defensive and offensive weapons, telling
the Russians and Cubans alike that the

United States would tolerate defensive
weapons which of course President
claimed the missiles to be none of
this would have happened. That
admitted Harvey, although alleged memory

weapons, which of course, the Russians claimed the missiles to be, then none of this would have happened. That finished Harvey as far as the Kennedys were concerned, but of course the reason given for his dismissal was when he sent in Eugenio Martinez, which we'll get into later.

During this period when Harvey builds up to his fight in April with RFK, and then later all through the half year before the missile crisis, Hubbard takes the chaff from Harvey ^{who} and is getting more and more irritated at taking orders from Harlot. On the one hand, Harvey is enormously powerful at JM/WAVE and yet he's under Harlot's thumb and Hubbard is acutely conscious of all of this.

On May 3, 1962, Harvey reports to an SGA meeting that 72 reporting sources were in place and three agent teams had just

March 22, 1962

On March 22, 1962, Hoover had a luncheon meeting with Kennedy at the White House to tell him that the FBI's investigation of the Mafia had revealed Exner's ties to Johnny Rosselli and Sam Giancana. In addition, Hoover said, Exner had made calls to the White House and seemed to have a telephone relationship with the President's secretary. Not knowing that she had been seeing Giancana and Rosselli at the president's request, Hoover warned Kennedy of the potential damage to his image if word got out. Exner says Kennedy was enraged when he called and told her of the meeting with Hoover. "I was so upset hearing about the lunch with Hoover that I didn't go back to Washington right away, which irritated Jack," says Exner. "We weren't getting along very well then, and when I finally did see him a few weeks later, I said I was sick of everything--the FBI agents and running back to Washington every time Jackie left the White House. He told me to stop worrying. 'If you'd just move here, to Washington,' he said, 'there wouldn't be any problems.'"

Now we come to March 22, 1962, a private lunch between Kennedy and Hoover. No record exists about what transpired. Possibly on the agenda were Giancana, Maheu and Exner. The last telephone contact between JFK and Exner occurred in the president's logs, is put down a few hours after the luncheon.

According to Exner, however, the president continued to see her although with decreasing periodicity and it all tapered off by June. It is possible he

Now for the lunch itself about which the chapter will be built: it's possible that the items discussed, the public items, van Doren, Jackie's tour, Glenn, Wilt Chamberlain scoring 100 points, can all be brought up in the form of badinage between the two men. Hoover can take great pleasure in speaking about how beautiful Jackie looks and what an asset she is to the president, knowing full well what he's going to get into later.

Then Hoover meets with RFK and states
"his great astonishment" that the CIA
would go in for such practices in view
of the bad reputation of Maheu and the
horrible judgment of using a man of
Giancana's background. Especially since
the gutter gossip is that the only
reason's nothing been done against
Giancana is because of his close

It may be that we won't use this as a confession, but as a description of his behavior given by someone else. Maybe she's told this by Rosselli. Or by somebody else in the entourage who's less prominent. In any event, however it's treated:

Giancana giggled every time he had to read from the index card, which he might in fact confess, ~~to Exner~~, came from the fact that in school when he was a kid, he couldn't read. Earlier that day Pierre Salinger had read into the record an interview Giancana gave. In answer to why he'd been called a psychopath by his draft board, Giancana replied, "I told them I stole for a living. They thought I was crazy but I wasn't. I was telling them the truth." Bobby Kennedy asked tougher

questions: "Would you tell us if you have opposition from anybody, do you dispose of them by having them stuffed in a trunk?" Giancana giggled.

Kennedy: "Are you going to tell us anything or just giggle? I thought only little girls giggled." In a tape from a tap that the agents have gotten at the armory, they hear Giancana complaining that if Kennedy got in, he thought they would have to pull the FBI off of him

"They [the FBI] hounded me all the time and I was terrified," says Exner. "I called Jack immediately to tell him that the FBI had been to see me, asking all sorts of questions about Sam. I told him I had said I knew nothing about Sam's business affairs. Jack reassured me. He said, 'Don't worry. They won't do anything to you. And don't worry about Sam. You know he works for us.' He told me that over and over: 'Don't worry, Sam works for us.'"

As the FBI surveillance increased, Exner pressured Kennedy to intervene. He'd say, 'Ignore them. It's just part of Hoover's vendetta against me.' He hated J. Edgar Hoover and called him 'a queer son of a bitch.' As the harassment got worse, Jack lost patience with me. 'You've got to learn to handle this,' he'd say. Then on August 5, 1962, Marilyn Monroe is found dead and Cal is morose over that. He tells a story of how they actually considered in 1956 sending him to visit her to talk her into spending the night with Sukarno, and Allen, who played with the idea for weeks, finally shot it down, much to Cal's disappointment. At the least, he would have gotten to meet her, and his secret feeling, he now confesses, is that there could have been some dynamite between them.

"How would you like to have had Marilyn Monroe for a step-mother?"
 "She was in love with Arthur Miller by 1956."
 "That's when Allen shot it down. He decided she was too hot to handle."

A day later, he calls up to say that through sources in the LA Police Department, he's found out that there's something wrong with her death and goes through the pills business rather carefully, since he's consulted the CIA high coroner just for his own information, and this coroner has had the contents of the coroner's report phoned to him, from his network of sources, and Cal is now brooding about whether the Kennedys did it. And hates the very thought of it. ~~He~~ discusses the hatred in which they're held in the Agency. And even more without. "I wouldn't be surprised, if you gave Sammy Giancana his choice, he'd knock off Kennedy before ^{as quick as} Castro. McCone was not popular with most of us

At this point there might be a portrait of McCone containing the material on the bullet proof limousine, which can be found in several places including Schlessinger. The story comes down to McCone noticing as Dulles drives off for the last time that he has a special bullet proof limousine and McCone tells the people at CIA (because he's just leaving in an ordinary Mercedes Benz limousine) that by the next afternoon when he's leaving work, he wants his own bullet-proof limousine, whereupon they go to extraordinary lengths, having General Motors get one ready, fly it in on a plane; they're ever soldering the last connections in the parking yard at

Langley as McCone comes down to get his limousine. And McCone never even says thank you, just drives off in it. He's particularly tough that way and for instance, has the door connecting his office with the DDCI, Marshall Carter, sealed off overnight, since he wants Carter, even though he's his number one assistant, to have to come around through the front office like anyone else. Carter then puts a hand on his door right where it would have been cut off at the ^{wrist} ~~seam~~ if the door had been closed on it. On this given day, which might be given earlier, McCone had come up with what he considered a sensible suggestion which is that instead of moving from Phase one, the inspiring of revolt, a "stepped-up course B plus," but instead, in a memo McCone sent to SGA on 8/8/62, "this variant be put in its place. Relations, as Harry sees them, between Lansdale and Harry, ^{are now settling} get worse and worse. ^{now marks for sub-par;} Harvey calls Lansdale a whacko to Harry, a security risk, and Lansdale complains to Harry that "it's impossible to get Bill Harvey to talk to me. he will not initiate a conversation and I'm not getting any information from him. On Sept 8, Harry Harvey took a photograph, slipped over to them by the Director of Intelligence, taken of the Soviet

freighter Omsk on its way toward Havana harbor. Trucks are lashed to the deck but the hatches are covered with tarpaulins so no idea can be obtained of the contents below. The freighter has been designed with huge hatches to be able to carry lumber. But the Russians weren't shipping lumber to Cuba.

Something else was in the hold and the ship was riding very high in the water, which suggests high volume and low density, or possibly, missiles, which

fulfill that category. Harvey was happy. → He checked possible routes for the missile & its port & roads & again. Here I quote directly from Wilderness of Mirrors, p. 141: ^{my bay,} ^{this accountant}

"On September 12, three days after the Omsk unloaded her mysterious cargo under cover of darkness, a 44 year old Cuban (Libt-rand?) accountant in a small town southwest of Havana looked up from his desk to see a large missile being towed through the

RFK is still concerned about progress on
the MONGOOSE program, keeps attending
meetings, telling them to mount more
intense sabotage operations. Massive
activity, he says, is "altogether within
the limits of the MONGOOSE framework."
He's now chairing the meetings. Once
again the old formula comes down on
October 14. The SGA is saying that
"considerably more sabotage should be
undertaken with the possibility of
getting rid of the Castro regime."

discussion with Helms for the first time with McCone of what it means to be a CIA man, and how battle fatigue affects them.

McCone calls ~~Harvey~~ and Sherman Kent, head of the Board of National Estimates into his office and asks ^{him} ~~them~~ why they failed to detect the missiles in Cuba. Kent says afterwards, "I've just been made a charter member of the Bleeding Asshole Society, ~~but~~ Bill Harvey's the president."

From the Man Who Kept the Secrets, p. 162.: "At the height of the missile crisis, Robert Kennedy told McCone that he wanted an immediate halt to all operations against Cuba and McCone passed the order on to Harvey. But Harvey, making the distinction between operations and agents, and thinking the United States might find itself in a

shooting war and in need of all the intelligence it could get, decided on one last attempt to send some agents in. On October 21, the day before President Kennedy announced the blockade of Cuba in a television speech, a CIA team headed by Eugenio Martinez, later of Watergate, landed 2 agents on the northern coast of Cuba. At least one other team made a similar landing on the same night. Later, at a meeting of the NSC executive committee held in the Joint Chiefs of Staff war room, Harvey was asked if all operations had been halted. "Well," he said, "all but one." He told them several agents had landed and there was no way to communicate with them and thus no way to recall them.

Harry is up in Washington at the time and knows by the atmosphere over at the Pentagon and also by what Martinez told him before he took off, that his mission

was to set out flares for the fighting force that would follow. ~~We're all going mad, thought Harry and Bill Harvey was leading the way.~~ Harry knows it was the military who put Harvey up to it, the military who told Harvey an invasion force was ready and they were desperately in need of advance flares.

He can tell by no more than the atmosphere at the Pentagon, which is livid these days, and the officers he passes in the corridors when ^{he's} ~~he's~~ over there on an errand all look like wild bulls and wild moose. They don't know whether they'll be heroes in a war or be dead or promoted, or whether the entire world is going to be destroyed in the next five days by nuclear warfare. We might get across something of the atmosphere of Washington at this point.

On October 28, the missile crisis is over.

How much of this I want to put in the book of what really happened with Kennedy, how much could come from Kittredge in a letter to him, is an interesting point. In effect, says Hubbard, here we go again, and gets the conversation over to Castro's character again. Fuertes, drinking Cuban rum, ^{is} in a strong conversational gambit, ^{and is all for anger} has to explain Castro's nature further, and he says, "Fidel always has to have the all-but-unattainable, the gem concealed in history, the vision of the end of danger. Everything in the tendency of the
Kennedys and the State Department will
be going in the opposite direction and
will eventually find an accommodation
with Castro. One is dealing with
liberals, after all. Helms, Cal assures

Harry, has been splendid through all
this and much tougher than one would
have expected. He is concealing all of
these potentialities from McCone, who is
a Kennedy man, and it takes plenty of
moxie to stand up at this point, since
Helms's career could, of course, be
shattered if it ever comes out. There's
no way that sooner or later he won't

other than natural causes, the US would
be charged with complicity, even though
Castro has many enemies. That's one
half of it, and it may be true that even
if we get Castro, Cuba may be more
Communist than ever."

But that's no
longer the issue. The Russians now have
a modus vivendi. What is worrisome is
the way Castro may be able to export
revolution to South America, the
Caribbean, Mexico, Central America.
Russia cannot do it on their own; that
would disturb the world balance, but
Cuba can, and it's my belief, Harry,
that if we get Castro, that possibility
is gravely impaired for them if not

At a Standing Group meeting on May 28, McCone argues for steps to "increase economic hardship" in Cuba and supplement it with sabotage. The idea is to "subvert military leaders to the point where they will be ready to overthrow Castro"

didn't recognize her but the next day he called her up and told her he was giving her Sidney Korshak for a lawyer. "The girl's in bad shape," says Rosselli, "and Giancana's worried she's going to fall apart. If she does, that means an awful lot is going to fall on us by way of Sammy Giancana."

That was in March. Since then she's been harassed by the FBI pretty steadily and has developed female trouble and the first week of June she had a D&C. Maybe this could be in a conversation she has with Jackie, this could be preferable, before Harry hears about the meeting with Rosselli. I can't really see Harvey and Rosselli discussing Judith Campbell at this great length. In any event, next morning, after the D&C, two FBI agents walk into her place and accuse her of having had an abortion. "You'll help yourself,"

The stuff that Rosselli and Harvey can
talk about is how Phyllis McGuire is so
scared of Giancana by now that even
though she can't bear to give him up, she
has lied to Dorothy Kilgallen and told
her she was going to do just that. The
heat is undeniably on Giancana. The FBI
reports on his connections in the CIA as
circulated through the bureau just
enough so the agents know how to taunt
Sammy. They come up to him in an
airport, or come up to his car as it is
stopped at a traffic light, or they tear
up to him on a golf course. They say,

Sinatra is forced to sell his interest
because of association with Sam. *Giancana*
Harvey goes off in a glow. The British on July

1 have named Kim Philby as a Soviet spy
which makes it 12 years after the fact,
official. Arttime is using what may be
CIA money for hit and run raids on Cuba
from Nicaragua. All the same, by June
and July of 63, anti-Castro Cubans in
Miami are seething with hatred for
Kennedy. Nothing is being done. His
brigade speech was naught but words.

Harlot has warned Harry to watch himself
in Miami. The Kennedy people have been
playing around with possibilities of
