

No Parking

It is certainly true that if Wilkes-Barre's parking problems are really symbols of a busy town, all may be well.

So that, Dr. Eugene Farley, Wilkes College president has some basis for hoping that the problem continues to grow, as it most certainly has in the immediate area of his school.

But it is also true that there is really a law of Diminishing Returns.

This can mean that if it becomes so nearly impossible to park that people are discouraged from coming to town to transact business, then the business health or the city faces impairment.

We just cannot let a complete blockade develop while, in effect, doing nothing but hoping that, somehow, somebody will provide.

This calls for community action and not the well wishes of friends.

No Solution Offered Farley Sees Parking Problem As Sign Of Community Growth

Wilkes President Points
To Factors That Brought
RCA Plant

Dr. Eugene S. Farley, president of Wilkes College, in a letter submitted today to the Times-Leader Evening News realizes that parking problems exist at Wilkes College and that such problems will continue to grow.

However, the college president views the parking problem as an evidence of growth, greater employment, and increased prosperity in the community.

This newspaper, in articles published the past two days, pointed out that while the college maintains a number of parking lots there just aren't enough parking spaces available for persons attending nighttime social functions or athletic events held at the college's Center for the Performing Arts or at the college gymnasium. Dr. Farley, however, does not touch on this aspect of the college parking situation in his letter which follows:

Managing Editor
Times-Leader Evening News:

In the article pertaining to parking at Wilkes, in your issue of November 29, you presented facts that are wrong while discussing a problem that is real. A parking problem has resulted from commitments in behalf of the community, that have been made by the college.

In 1939 the college made a commitment which brought RCA to Wilkes-Barre and that commitment has been responsible for the creation of 5,000 to 6,000 regional jobs. Wilkes College made that commitment at the request of the Chamber of Commerce after it was understood that RCA would not come to Wilkes-Barre because graduate programs in chemistry and physics were not then available.

Science Center

To meet this commitment, Wilkes College has developed a two and a half million dollar science complex and has brought 24 Ph.D.'s who teach in the sciences and simultaneously conduct research studies.

To make good on the commitment that brought RCA to Wilkes-Barre the college has spent \$1,250,000 on buildings and equipment and has increased its operating costs by \$75,000 per year.

Although the financial strain has been great I do not believe that any of us at the college regret the commitment that we have made and which has been beneficial to the people of the region. It was one of many community efforts which changed the downward trend of the area and provided a sound base for further development. The commitment to establish a graduate program has created financial and personnel problems which we have met with the support of our friends. If the effects of this commitment continue to encourage further economic development of the area, I am sure that all of us will rejoice. It is disturbing, however, to find that the college is under criticism because minor problems have been created by the commitment that we have made in behalf of the region.

One Space, 10 Students

In your article it was charged that Wilkes is not providing adequate parking space. I would like to call your attention to the fact that we are required to provide one parking space for each ten students. In fact, the morning after your article appeared, I counted 270 cars parked in the eight areas provided by the college. With a full-time day enrollment of 2204 students we are able to meet the legal requirements, but as is true with all city colleges, we cannot satisfy the ever increasing desire for parking space.

It is our hope and belief that parking problems will continue to grow for these are evidences of growth, greater employment, and increased prosperity.

Sincerely yours,
EUGENE S. FARLEY,
President,
Wilkes College.

Farley To Speak At Trinity Church

Dr. Eugene S. Farley, above, president of Wilkes College, will be the guest speaker at the Stewardship Sunday service to be held at the Dallas Trinity United Presbyterian Church on December 3.

The service will kick off the church's Every Member Canvass Campaign scheduled to start on Sunday. Canvassers will visit the homes of members to review the church and its financial status. Pledges for 1968 will be requested.

Dr. Farley, born in Phoenixville, obtained his BS degree from Pennsylvania State and his PhD from the University of Pennsylvania. After several teaching positions he became director of Bucknell University Junior College in 1936 becoming president of Wilkes in 1947.

Prominent in community affairs, Dr. Farley is active in Kiwanis and the Chamber of Commerce. Board memberships include the Wyoming Valley Hospital, Greater Wilkes-Barre Industrial Fund, Inc., Osterhout Library, Pennsylvania Power and Light Company and Pennsylvania Millers Mutual Insurance Company.

Trinity To Hear Dr. Farley Speak

Dr. Eugene S. Farley, president of Wilkes College, will speak at Trinity ~~United~~ Presbyterian Church Sunday morning at 11. Rev. Andrew Pillarella yielding his pulpit on this occasion.

Dr. Farley, summer resident of Beaumont, has not announced his topic.

He has been president of Wilkes College ever since the fledgling Bucknell Junior College was founded and grew to a size where it could be expected to become a four year college, with a change of name necessary.

Dr. Farley moved up the scale from presidency of the small and completely local Junior College, to presidency of a rapidly expanding educational complex with dormitories and an impressive building program well under way.

He is of the Society of Friends.

Schools Join Training Plan

Seek to Improve Teacher Education

Two local colleges are among seven educational institutions in Pennsylvania which have announced plans to combine in a program designed to strengthen graduate-level preparation of teachers for public and private secondary and elementary schools.

Sister M. St. Mary, Marywood College, and Dr. Eugene S. Farley, Wilkes College, joined the following other presidents of the institutions involved in making the simultaneous announcement: Dr. W. Deming Lewis, Lehigh University; Very Rev. J. Stuart Dooling, Allentown College of St. Francis de Sales; Dr. Raymond S. Haupt, Moravian College; Dr. Erling N. Jensen, Muhlenberg College, and Dr. Donald L. Helfferich, Ursinus College.

The academic partnership, to be known as the "Lehigh Regional Consortium for Graduate Teacher Education," will have headquarters at Lehigh University's School of Education. Programs will initially affect a 6,000 square mile area in Pennsylvania with a total population of 1.5 million, including a school population of some 300,000.

Dr. Joseph S. Butterwick of Lehigh's School of Education, who is serving as coordinator in the formative stages of the consortium, will present suggestions for future action and initiation of programs at the first meeting of the policy committee scheduled for Lehigh later this month, subject to the approval of the seven presidents.

Four local school officials are members of the policy committee. They are: Sister M. Michel Keenan, chairman of graduate division, and Sister M. Bernardina McAndrew, head of the department of psychology, both of Marywood College, and Dr. Francis J. Michelini, dean of academic affairs, and Dr. Ralph B. Rozelle, director of the graduate division, both of Wilkes College.

Included in the primary geographic region of the consortium will be all of Susquehanna, Pike, Wayne, Wyoming, Lackawanna, Luzerne, Carbon, Monroe, Lehigh and Northampton Counties and northern Bucks and Montgomery Counties.

State Council Report Makes No Mention of N.E. Pennsylvania

'Master Plan' of Penn State Foes Still in 'Twilight Zone'

(Second of a series)

By Wm. J. McLAUGHLIN

Although "The Master Plan for Higher Education in Pennsylvania" is a document cited by Wilkes-Barre area college officials as a basis for opposing the county commissioners' offer of a site at Kis-Lyn to The Pennsylvania State University, the plan makes no mention at all of higher education in northeast Pennsylvania.

This newspaper has obtained a copy of the plan from the Depart-

ment of Public Instruction in Harrisburg. It is a 45-page booklet prepared for the State Board of Education. The board adopted it and transmitted it to then governor, William W. Scranton.

Requires Legislation

The "Master Plan" has not been formally adopted as a guide to the development of higher education in Pennsylvania.

"At present, the plan is in a 'twilight zone', Dr. Donald J. M. Miller, of the Bureau of Higher Education Development of the DPI said on Monday.

Dr. Miller added, "A good bit of

it requires legislation before it can be implemented, and this legislation has not yet been introduced," he stated.

The State Board of Education which sent the plan to Governor Scranton is appointed by the governor. It is made up of two six-member councils, The Council of Basic Education and the Council of Higher Education, three members "at large", the chairman, Dr. Otis C. McCreery, and the state superintendent of public instruction.

Scranton U. Member

Dr. Leonard N. Wolf, of the Uni-

versity of Scranton, is a member of the Council of Higher Education. He presented the institution's own opposing views on higher education to the state board in a 68-page booklet.

More than half of the membership of the advisory committee came from private colleges in Pennsylvania.

Farley An Advisor

One of its members was Dr. Eugene S. Farley, president of Wilkes College, the leading force in opposition to the development of Penn State in this area.

Another member was Dr. Eric Walker, president of The Pennsyl-

vania State University, who presented the institution's own opposing views on higher education to the state board in a 68-page booklet.

More than half of the membership of the advisory committee came from private colleges in Pennsylvania.

In the preface to its report, the State Board said that development of a master plan was "urgent."

Prepared by Outsiders

For this reason, it entered into contracts with four outside agencies "to shorten the time necessary for the preparation of a Mas-

ter Plan and add an element of objectivity based on national, rather than Commonwealth, experience."

One of these reports dealt with vocational-technical education, a second with the organization of the state colleges, a third with community colleges. The last is titled, "Elements of a Master Plan for Higher Education in Pennsylvania." This was prepared by a private corporation, "Academy for Educational Development, Inc."

Breakdown of Plan

The Master Plan report has a summary statement and nine sep-

arate chapters: Introduction, Students and Enrollments, Range of Programs, A Commonwealth System of Higher Education and its Allocation of Responsibility, Financing, Governance, Aid to Students, The Commonwealth's Concern for Private Higher Education, and Estimates of Costs.

Nowhere in the report is there mention of northeast Pennsylvania or of any other part of the state, although the inference could be drawn from Dr. Farley's statements that the Master Plan backs up his opposition to Penn State at Kis-Lyn.

Graduates Hear Wilkes President

PEGGY JAYNE WILVERDING

GRADUATES TONIGHT: —
Miss Peggy Jayne Wilverding, daughter of Mrs. John T. Wilverding, 644 West Avenue, Sewaren, and the late Mr. Wilverding, will be graduated tonight from the stenographic course of Wilkes-Barre Business College, Wilkes-Barre, Pa., with a graduation dinner to be held at the Fox Hill Country Club, Wyoming, Pa. Dr. Eugene S. Farley, president of Wilkes College, Wilkes-Barre, will deliver the graduation address.

A 1966 graduate of Woodbridge Senior High School, Miss Wilverding is a member of Beta Chi Sorority and the college choral group.

Wife Of Thailand Doctor Will Receive Diploma

Among the students to receive diplomas at the May graduation exercises of Wilkes-Barre Business College will be Mrs. Wimorot Kotrapu of Thailand.

Mrs. Kotrapu is shown pointing out the location of her homeland to the other students who

will receive stenographic diplomas at the program. At left is Carole Ann Stella of Plains Township and at right is Anne Weiscarger of Pittston.

Mrs. Kotrapu is the wife of Dr. Niran Kotrapu, a member of the staff at Mercy Hospital. They

Shareholders OK Charter Changes, Re-Elect Board

More than 650 Pennsylvania Power and Light Company shareowners met last week in Hazleton for the utility's 47th annual meeting.

With more than 80 per cent of the utility shares being voted, the shareholders approved an amendment to the company's charter to allow the utility to engage in business activities other than supplying energy.

The 12 directors of P. P. and L. were re-elected. They include Jack K. Busby, of Allentown, president; Philip H. Cooney, of Philadelphia, director and member of executive committee of Insurance Company of North America; Ralph R. Cranmer, of Williamsport, president and general manager of Grit Publishing Company; Dr. Edgar L. Dessen, of Hazleton, physician and radiologist; Eugene S. Farley, of Wilkes-Barre, president of Wilkes College, and Ira Hawkins, of New York City, member of the law firm of Simpson, Thacher and Bartlett.

dividend, equivalent to \$1.52 a share on an annual basis.

P. P. and L. estimates expenditures of \$456,000,000 for plant expansion during 1967 through 1971, Mr. Fortune said. Expenditures for 1967 are planned at \$118,000,000.

ALSO, Dr. W. Deming Lewis, of Bethlehem, president of Lehigh University; John A. Noble, of Scranton, president of Cleland Simpson Company; Harold S. Overholt, of Pittsburgh, executive vice president of Mellon National Bank and Trust Company; Joseph T. Simpson, of Harrisburg, chairman of the board and president of Harsco Corporation; M. J. Warnock, of Lancaster, president of Armstrong Cork Company, and Joseph S. Young, of Allentown, chairman of the executive committee of Lehigh Portland Cement Company.

In a report on the financial results for the first quarter of 1967, Robert R. Fortune, vice president, financial, said the company's growth in sales had substantially exceeded that of the last three years and indications are this high rate of growth is continuing.

Mr. Fortune noted that no rate reductions are planned for 1967.

Earnings were up to 61 cents a share for the quarter. Quarterly dividends on common stock were increased from 37 cents to 38 cents a share beginning with the April 1, 1967,

Earnings, Sales Up For PP&L

**Gains Achieved
Despite Reduction
In Electric Cost**

**By JACK POLLARD
Intell Staff Writer**

Pennsylvania Power & Light Co. Monday reported total revenues for the first quarter of 1967 exceeded \$49 million, an increase of 7.9 per cent over the same period last year.

Earnings of 61 cents a share for the quarter were two cents higher than in 1966, or a 4.4 per cent boost.

Quarterly dividends on common stock were increased from 37 cents to 39 cents a share, starting with the dividend paid April 1, equal to \$1.52 a share on an annual basis.

Robert R. Fortune, vice president of finance, told the annual meeting of shareholders, the revenue gain was achieved despite a four per cent reduction in the average selling price of electricity.

PP&L dropped the price of its electric energy to 1.71 cents for the last 12 months.

INCREASED USAGE

Fortune said the reduced rate is a result of increased usage by customers in the lower steps of rate tariffs and the company's rate design. He said no further price reductions are planned for this year.

Fortune said the dividend increase was "dictated by the need to retain a higher percentage of earning to help finance a large construction program."

The utility plans to spend \$456 million for plant expansion during the 1967-71 period.

Expenditures for this year alone are proposed at \$118 million, of which \$25 million already was spent in the first three months of the year.

Fortune said the record 5-year construction project is necessary because of the spiraling growth in sales.

OUTSIDE SOURCES

An estimated \$255 million will be raised from outside sources, he explained, to help finance the 5-year project and to provide \$25 million for maturing debt obligations and other cash needs.

This represents 53 per cent of the company's total money requirements and will come mainly through sale of debt securities, said Fortune.

The remaining 47 per cent is expected to be financed from operations, primarily depreciation provisions and retained earnings, he pointed out.

PP&L recently announced the sale of additional common stock which will bring in \$18.6 million.

Share holders were notified they can subscribe to one additional share of stock, at \$30 a share, for each 20 shares held of record Friday, April 14.

Fortune said the company also will sell mortgage bonds later in the year. "The amount and time of sale will depend on market conditions."

He announced that at the end of the 5-year expansion in 1971, investors will have provided an estimated \$920 million.

BUSBY REELECTED

Jack B. Busby, president of the utility, was reelected to the company's board of directors. Also named to the board were Philip H. Cooney, Philadelphia, director and member of the executive committee of Insurance Co. of North America; Ralph R. Cranmer, Williamsport, president and general manager of Grit Publishing Co.; Dr. Edgar L. Dessen, Hazleton, physician and radiologist; Eugene S. Farley, Wilkes-Barre, president of Wilkes College; and Ira Hawkins, New York City, member of law firm of Simpson Thacher & Bartlett.

WARNOCK ON BOARD

Also, Dr. W. Deming Lewis, Bethlehem, president of Lehigh University; John A. Noble, Scranton, president of Cleland Simpson Co.; Harold S. Overholt, Pittsburgh, executive vice president of Mellon National Bank and Trust Co.; John T. Simpson, Harrisburg, chairman of the board and president of Harco Corp.; M. J. Warnock, Lancaster president of Armstrong Cork Co.; and Joseph S. Young, Allentown, chairman of the executive committee of Lehigh Portland Cement Co.

This is the first year that Cranmer and Lewis will serve on PP&L's Board of Directors.

More than 70 PP&L stockholders were on hand for the annual meeting. Eighty-three per cent of the 13,289,075 outstanding shares of stock was represented, either in person or by proxy.

Annual Meeting Of Shareholders In PP&L Begins

Shareholders of the Pennsylvania Power & Light Co. met today in Hazleton for their 47th annual session to elect directors and approve a proposal to amend the company's charter to allow for diversification into other fields.

The sessions also marked the final appearance of Charles E. Oakes as chairman of the board. He was one of two directors retiring today, along with John G. Detwiler, Williamsport.

President Jack K. Busby convened the meeting at 2 o'clock this afternoon in the Gus Genetti Motor Lodge near Hazleton.

Two Successors

Nominated to succeed Oakes and Detwiler were Dr. W. Deming Lewis, Bethlehem, president of Lehigh University, and Ralph R. Crago, Williamsport, president and general manager of the Lehigh Co.

The other directors up for election are: Philip H. Cooney, Philadelphia, director and member of the executive committee of Insurance Company of North America; Dr. Edgar L. Dessen, Hazleton, physician and radiologist; Eugene S. Farley, Wilkes-Barre, president of Wilkes College; Ira Hawkins, New York City, member of the law firm of Simpson, Thacher & Bartlett.

John A. Noble, Scranton, president of Cleland Simpson Co.; Harold S. Overholt, Pittsburgh, executive vice president of Mellon National Bank and Trust Co.; Joseph T. Simpson, Harrisburg, chairman of the board and president of Harsco Corp.; M. J. Warnock, Lancaster, president of Armstrong Cork

Co., and Joseph S. Young, Allentown, chairman of the executive committee of Lehigh Portland Cement Co.

Charter Change

The charter change was to allow the company to come under the new business corporation law. It had already been approved by the board of directors in January.

As a result of the change the company would be allowed to engage in business other than the supplying of energy. Company officials point out there is no such plan at present to go into any other business activity.

The financial report for the first quarter of 1967 was presented by Robert R. Fortune, vice president.

The shareholders also were called on to ratify board of directors' action in the appointment of independent public accountants to audit the books.

Company officers took part in a question and answer period with the shareholders. Taking part in this were Oakes; Busby; Fortune; Austin Gavin, vice president - management services; Willard U. Baum, assistant vice president - system power and engineering; Brooke R. Hartman Sr., vice president - division operations; John S. Davison, vice president - Northeast Division, and William H. Crago, general counsel and secretary.

EDUCATIONAL TRENDS EYED

Engineers Told Impact Vital To Economy

Dr. Eugene Farley, president of Wilkes College, spoke on the impact of changing industrial and manufacturing requirements on the educational system at a meeting of the Luzerne County Chapter, Pennsylvania Society of Professional Engineers, last night at the Gus Genetti Hotel.

During the last 15 years education has gained a new position in society, Dr. Farley said. He added that education had been looked upon as essential to the professionals and as a means of producing a united citizenry. Today, he stated, education is not only essential to political stability, but it has become a vital and essential part of the nation's economy.

In the past, the speaker went on, economic vitality depended successively upon land and sea trade, turnpikes, canals, railroads, mining, heavy industry and the automobile. In the different periods of American development, each of these industries had been considered as the base of the nation's economy. Today, he said, they are all essential, but the dependence on science and technology has increased the importance of trained and highly educated personnel. The future does not depend on the exploitation of resources, Dr. Farley said, it depends on the development of people and the conservation of resources.

Professional training is basic in economy, engineering, science and medicine and the field of importance is electronics, he said.

The speaker stated it cost Wilkes College \$1,500,000 to set up a graduate program in electronics, chemistry and physics and it will cost \$2,500,000 more to set up an engineering graduate program.

Dr. Farley stressed the value of the engineering field and stated it is the engineer in an industry who is most likely to succeed in material or supervisory capacities, especially if education is continued.

Farley was introduced by Cromwell Thomas, professor at Wilkes College.

Donna Troiano, Vineland, N. J., a civil engineer and president of the State society chapter at Wilkes, was introduced.

Bernard Gallagher, chapter president, conducted the business session.

Farley to Address Engineers Tonight

Luzerne County Chapter, Pennsylvania Society of Professional Engineers, will hold its March meeting tonight at the Gus Genetti Hotel. The meeting will begin with a social hour at 6 followed by dinner at 7.

Speaker will be Dr. Eugene Farley, president of Wilkes College, who will outline the impact of changing industrial and manufacturing requirements on the educational system.

Prof. Cromwell Thomas, program chairman, noted Dr. Farley has devoted many years to education. He is a graduate of Pennsylvania State College and University of Pennsylvania and came to Wilkes-Barre in 1936 to direct Bucknell University Junior College. He has been president of Wilkes College since its inception.

Dr. Farley is a member of the Governor's Council on Science and Technology, Pennsylvania Advisory Committee on Higher Education and the Pennsylvania Advisory Committee on Community Colleges.

Farley To Address Engineers Tomorrow

Dr. Eugene Farley, president of Wilkes College, will be guest speaker at the March meeting of the Luzerne County Chapter, Pennsylvania Society of Professional Engineers, tomorrow night at the Gus Genetti Hotel, city. The meeting will begin with a social hour at 6, followed by dinner at 7 p. m.

Professor Cromwell Thomas, program chairman for the meeting, announced that Dr. Farley will outline the impact of changing industrial and manufacturing requirements on the educational system. He pointed out that the speaker is a member of the Governor's Council on Science and Technology, a member of the Pennsylvania Advisory Committee on Higher Education and also a member of the Pennsylvania Advisory Committee on Community Colleges.

Dr. Farley is a graduate of Pennsylvania State College and the University of Pennsylvania. He came to Wilkes-Barre in 1936 to direct the Bucknell Junior College and has been president of Wilkes College since its inception.

Chairman

CROMWELL THOMAS

Dr. Eugene Farley, president of Wilkes College, will speak on "Growing Demands of Industry on Higher Education," at a meeting of Luzerne County Chapter, Pennsylvania Society of Professional Engineers, Thursday night at 6 in Gus Genetti Hotel.

Dr. Farley will be introduced by Prof. Cromwell Thomas, an instructor at Wilkes College, who is program chairman.

Dr. Eugene S. Farley

Methodist Men's Program Will Feature College Pres.

Dr. Eugene S. Farley, president of Wilkes College, will be the speaker for the first annual ladies night dinner of the Conyngham Valley Methodist Men, it was announced today by President Paul Stewart.

The dinner will be held at 6:30 p.m. Monday at the Conyngham United Church of Christ.

Dr. Farley, who has served as president of Wilkes College since 1947, was graduated from Pennsylvania State University and the University of Pennsylvania, where he received his Ph.D in 1932.

Dr. Farley taught at the Germantown Academy and was a Harrison Scholar and Fellow at the University of Pennsylvania. He also

was an instructor in education at the university for two years.

Dr. Farley was director of research for the Newark, N.J. board of education and served for 11 years as director of the Bucknell University Junior College.

The guest speaker served in World War One and is a member of the Society of Friends and a number of professional societies. He holds honorary degrees from Alliance and Lafayette Colleges.

Methodist Men Told Deer Kill Is Heavy on Shortway

There have been as many as 18 deer killed by cars in a single night on the section of Interstate 80 between Rt. 309 and Stroudsburg, Game Protector Robert Nolf told the Conyngham Valley Methodist Men last night at the Drums Methodist Church.

Nolf's comment came during a question and answer period following a film showing how the state is rebuilding its wild turkey supply.

Although the deer kills on the new freeway are not as numerous as he anticipated, Nolf said the slaughter could be further reduced with the installation of nine-foot "deerproof" fences. The district game protector said he had recommended this type of fence before the highway was constructed, but that a lower right-of-way fence was installed instead.

Nolf said the Northeast Extension of the Turnpike winds between two nine-foot fences, and that deer kills by automobiles on this road have been exceptionally low.

In remarks prior to the film, Nolf described Pennsylvania as the most diversified hunting state in the nation, a fact that lured 52,000 non-resident hunters here last year.

The \$25.35 paid by non-residents plus fees paid by Pennsylvania residents pumped \$20 million in the state's economy, the speaker said.

Although the wild turkey kill was up 50 per cent this year, this section of the state is not as attractive to the birds as the north central section, Nolf said. He predicted, however, that the trukey population—boosted by a systematic propagation plan that harvested 35,000 birds last year—soon will offer more game to hunters in this area.

During a business meeting, the

group voted to contribute \$50 to each of the three valley Methodist churches for new hymnals. The money was raised during a birthday calendar campaign.

President Paul Stewart said the December meeting, a ladies night dinner, will be held Dec. 19 in the Conyngham United Church of Christ, when Dr. Eugene Farley, Wilkes College president, will be the speaker.

Richard Kerschner led the devotional period and Howard Kramer introduced the speaker.

Husband-Wife MDs To Leave T-burg

TRUMANSBURG — Trumansburg's popular husband and wife medical team, Dr. Eugene S. Farley Jr. and Dr. Linda Farley of 6 Congress St., are leaving the community.

They have closed their office after being in Trumansburg for 7 years.

They will make their home in Baltimore, Md., where Dr. Eugene Farley is entering the Johns Hopkins University for advanced public health studies.

The medical couple will be honored at a community farewell reception Sunday from 2 to 5 p.m. at the Dickerson High School.

Dr. Eugene Farley, a native of Wilkes-Barre, Pa., is the son of Eugene S. Farley Sr., president of Wilkes College in Wilkes-Barre.

He graduated from Swarthmore College and the University of Rochester School of Medicine, interned at Philadelphia General Hospital and in 1955-56 was in residency at the University of Colorado. In 1958-59 he was resident in internal medicine at the University of Vermont.

Dr. Linda Farley, the former Linda Fabry, graduated from

the University of Rochester and the UR Medical School. She interned at Denver General Hospital.

The Farleys were married on July 2, 1955. During 1956 to 1958 they were stationed on the Navajo Reservation at Many Farms, Ariz. They were at a Cornell University-operated clinic under contract with the Public Health Service and the Navajo Tribal Council.

In 1959 they came to Trumansburg. Dr. Linda worked alongside her husband in the office, mainly in the area of pediatrics.

Both have taken part in the community life of Trumansburg. They were program chairmen of the Trumansburg Parent-Teacher Association in 1963-64.

They were examining physicians at Trumansburg and Interlaken central schools and both worked with youth on many school and community projects.

Dr. Eugene Farley joined the Trumansburg Rotary Club and the Chamber of Commerce. His wife entered village politics and was one of the first women to be elected to the board of trustees. She ran under the Pioneer Party label against the usually unopposed Citizens Party.

She served as the attending physician at the Trumansburg, Interlaken and Ovid well-baby clinics. She served on the Community Council and was trustee was appointed water commissioner.

For the Ithaca Arts Fair, she performed with her own home-made puppet show, which was a hit of the festival.

In the months ahead while her husband is taking his university studies, she plans no professional career.

The Farleys have four sons, Jonathan, Tillman, Shedden and Joshua.

After the year at Johns Hopkins, Dr. Eugene may spend one or two years in foreign fields.

His ambitions include teaching in a department of community medicine to help solve the doctor shortage in rural areas by working out methods of securing medical care in urban regions and encouraging more physicians into the country.

The Roving Reporter

Attraction for Industry Educators, Brochure Cite Community College Value

By TED MELLIN

The president of Wilkes College said recently community colleges are "indispensable to the vitality of our economy and the prosperity of our workers."

Dr. Eugene S. Farley made the observation in a speech in which he decried Pennsylvania's belated start in establishing a network of community colleges.

"At the moment," he said, "some persons are concerned by the increased costs that community colleges will impose upon the communities and the state. This hesitancy would be justified were this not an investment in the development of human resources.

"It is, however, an essential investment. . . ."

Dr. Farley made the remarks years of age living in this area will be 45 per cent greater in 1970 than it was in 1960.

"Untrained and unemployed youth not only create many social problems, but also are a deterrent to attracting new industry. It is well known that the majority of superior children work on the lower occupational levels, where most of them are destined to remain unless they have the educational opportunities locally in preparing themselves for a higher occupational level.

"It is only through technical training beyond high school in the local community that the needs of business and industry can be met and the resources of our superior youth utilized."

5 Advantages Cited

What are the advantages of a community college?

The brochure lists five: (1) the school is within commuting distance, (2) it is economical to the student, the community and the state, (3) the program can be geared to the specific needs of the community, (4) the program may be

flexible, and (5) the school provides a center for all types of continuing education programs.

The Allentown School Board has designated itself as the interim sponsor of the proposed community college. It is seeking to have other districts join as cosponsors.

The sponsoring agency, or agencies, will appoint a board of trustees to administer the school and provide the necessary physical plant. The sponsors also will provide two-thirds of the annual operating costs and up to 100 per cent of the capital expenses. The other one-third of the operating costs will be reimbursed by the state.

A survey by the Citizens Advisory Committee in 1958 showed 415 of the 770 high school seniors in Allentown who responded to a questionnaire would have been interested in attending a community college.

Lack of permissive legislation prevented any formal action for establishing a community college then. But Allentown School District started fulltime post-high school courses under regulations pertaining to vocational and technical education.

A course in practical nursing was begun in 1958. It was followed by programs in electronics technology, doctor's assistant, chemical technology, and data-processing and computer-programming.

Chamber Project

Last year, when the Community College Act became law, the Allentown Chamber of Commerce adopted the community college as an educational project and appointed an advisory committee to assist in developing and promoting a community college. The committee comprised educators, businessmen and industrialists from Lehigh County.

As an outgrowth of the study, the advisory committee recommended that Lehigh County be considered the area to be served by the community college and recommended Allentown School District be the interim sponsor while other districts studied the possibility of being cosponsors.

Allentown School Board adopted a resolution last July 30 approving the interim sponsorship.

It would be at least another year before the community college could be established, Dr. Fink told the Lehigh County School Board.

College and Community Honor Dr. Farley

Recognition Given College President in Twenty-Fifth Year

by Barbara Ann Lore

A broad variety of interests and backgrounds is the chief characteristic of the principal speakers for the testimonial dinner honoring Dr. Farley, Wilkes College President, tomorrow evening. These men represent careers ranging from financial counselor of a philanthropic institution to Norwegian educator and author of a German grammar textbook.

Jesse Choper, an alumnus of Wilkes College and present assistant professor of law at the University of Minnesota, will act as toastmaster for the affair. Choper, who garnered many honors while at Wilkes, was a member of the Wilkes debating team that won the Harvard Tournament and the Pennsylvania State Tournament in 1957. At this time he ranked third in the country. Since he left Wilkes in 1957, Choper has led an active and varied life culminating last year in his appointment as law clerk to Chief Justice Earl Warren. Besides membership in the Order of Coif — a legal honor society whose members are the top 10% of the law graduates of certain schools, he holds membership in the bars of the U.S. District Court for District of Columbia and the U.S. Court of Appeals for District of Columbia Circuit Court.

Arnaud C. Marts

Admiral Harold R. Stark

Dr. K. Roald Bergethon

Jesse Choper

An international flavor will be given to the occasion by Dr. K. Roald Bergethon, president of Lafayette College, who is a native of Tromsø, Norway. Dr. Bergethon attended grammar schools and high school in Brooklyn but returned to Tromsø to complete his secondary education at the "Hoiere Almen-skole". During World War II, while working on the construction of military installations and manufacturing plants required for war efforts, he received a citation for meritorious civilian service from the U.S. Navy. In 1953, while associate dean at Brown University, he was awarded a Carnegie Corporation travel grant which enabled him to observe undergraduate educational programs at more than twenty colleges and universities throughout the nation. Author of Grammar for Reading German and a bibliography of Norwegian literature, Bergethon also contributes book reviews and articles concerning the teaching of German and education administration to professional journals.

Arnaud C. Marts has a special interest in the college's history.

nell University had fostered a junior college in Wilkes-Barre and Marts who served as president of Bucknell University from 1935 to 1945 inherited the problem of formulating permanent plans for this center of learning. Since he devoted so much time and energy to this problem, he naturally is interested in progress and development of Wilkes. Marts, financial counselor for Marts and Lundy, Inc., philanthropic institution in New York, has had experience in the fields of education, business, politics, civic service, and writing. In his capacity as an author, he has written two books, *Philanthropy's Role in Civilization* and *Man's Concern for His Fellow Man*.

Chairman of the Board of Trustees of Wilkes College, Admiral Harold R. Stark, USN retired, will represent that body on Saturday evening. Admiral Stark, now residing in Washington, D.C., is a former commander of the European fleet during World War II and a former chief of naval operations in the U.S. Navy. That his services were valuable is evidenced by the fact that he was kept on duty beyond retirement age at the request

DR. FARLEY

(continued from page 1)
of Winston Churchill.

Atty. Andrew Hourigan, Jr., senior partner of Hourigan, Kluger, and Spohrer, and president of the Greater Wilkes-Barre Chamber of Commerce, will be present to honor Dr. Farley as a representative of the community. A graduate of Wyoming Seminary, Princeton University, and University of Pennsylvania Law School, he is actively engaged in many facets of community life. Among the numerous associations with which he is associated are: Blue Cross of Northeastern Penna., Penna. and Wyoming Valley United Fund, Council for Mentally Retarded, Mercy Hospital, Miners National Bank, Committee of 100, and the Wilkes-Barre Chamber of Commerce.

Mayor Frank Slattery will welcome the group assembled to honor Dr. Farley.

Highlight of the events planned for this day is the dinner scheduled for tomorrow evening at 6:30 p.m. in the gymnasium on S. Franklin St. at which these men will appear. An Honorary Breakfast, sponsored by the Associated Women Students of Wilkes will commence the activities at 9 a.m. in the Adams Room of the Hotel Sterling. To continue the festivities, the Wilkes College Band will render a medley of songs in front of Dr. Farley's home later in the morning. At this time, Ed Rogalski will present Dr. Farley with a scroll containing the signatures of students on campus. The Band will also play outside the gym tomorrow evening to entertain guests arriving for the testimonial dinner.

HIS BOYHOOD AMBITION WAS TO BE A FARMER. HE PROCEEDED TO BUY & DEVELOP A FARM AFTER GRADUATING FROM PENN STATE. BUT AFTER A YEAR HE DECIDED TO MAKE EDUCATION HIS LIFE'S WORK.

TODAY, HIS HOBBY IS WORKING AROUND HIS FARM AT BEAUMONT.

HIS FIRST TEACHING POST WAS AT THE GERMANTOWN ACADEMY. LATER HE BECAME AN INSTRUCTOR AT THE U. OF PENNA WHERE HE RECEIVED AN M.A. DEGREE IN 1926 & PH.D. IN 1935. FROM 1929-36 HE WAS DIRECTOR OF RESEARCH FOR THE BOARD OF EDUCATION, NEWARK, N.J.

COMING HERE IN 1936 TO HEAD BUCKNELL JR. COLLEGE HE SOON MADE PLANS TO DEVELOP IT INTO A 4-YEAR, INDEPENDENT INSTITUTION....AIDED BY AN AMBITIOUS BOARD OF TRUSTEES & INTERESTED CITIZENS, THE JR. COLL. ACQUIRED EIGHT LARGE RESIDENCES SUITABLE FOR COLLEGE BUILDINGS OVER A TEN-YEAR PERIOD....

DR. FARLEY MADE THE COLLEGE AVAILABLE FOR AIR FORCE TRAINING DETACHMENTS DURING THE WAR YEARS.

THE JUNIOR COLLEGE BECAME WILKES COLLEGE IN JUNE, 1947, AND DR. FARLEY WAS NAMED ITS FIRST PRESIDENT...BECAUSE OF HIM YOUTH CAN LOOK FORWARD TO A BRIGHTER FUTURE...

EUGENE S. FARLEY.
